<b>Treatment:</b>	Bifenthrin glue line treatment to AS/NZS 1604 to H2 level against borers and termites.
<b>Formaldehyde:</b>	Emission "EO"
<b>Applications:</b>	DIY, set production, signs, linings & partitions, cupboards, etc.

**PRODUCT DESCRIPTION**

With smooth sanded faces both sides this mixed light hardwood plywood can be utilised in various interior and semi-exterior applications. Colour variation in the face veneers does exist between sheets and is commonly used in situations that don't require a structural rating, but where strength and a good appearance are preferred.

**Finishing**

In semi exposed exterior applications, the product must be adequately protected by the use of a suitable water based, exterior paint or stain on both sides of the sheet & edges, irrespective of whether the sides are exposed to the weather or not. It's recommended to contact a reputable paint supplier and follow the manufacturer's instructions. Do not use oil-based products on this plywood as oil-based paints or stains may penetrate the surface veneer of the plywood and react with adhesives that bond the core veneers together. No warranty or guarantee is offered by Plywood & Panel Supplies Pty Ltd (PPS) if oil-based paint or stain has been applied to the plywood. This plywood is not suitable for use in the manufacture of doors and no warranty/ guarantee is offered by PPS if this plywood is utilised in any application associated with the manufacture of doors.
