

CUTEK® INTERIOR

CUTEK® Interior is a water-based, ultra-matt, polyurethane coating designed to protect interior timber applications. The ultra-matt finish resists polishing effect and keeps the natural look of uncoated timber.

Keep the natural look and feel

Long-term protection

Environmentally responsible formulation

Fast drying

Safe and user friendly

Ultra-matt finish

Almost invisible to the eye, CUTEK® Interior is an environmentally friendly, low odour and low VOC formulation that uses advanced recycling technologies.

CUTEK® Interior is easy to use and fast drying. It is a DIY-friendly product with a professional finish that can be achieved by beginners. Maintenance and/or spot repairs are also quick and simple.

Important information before proceeding

CUTEK® Interior may react with soluble extractives from high extractive timbers (such as Vitex) that can present as a discolouration in the dried coating. It is vital that the end user determine the suitability of CUTEK® Interior for their own purpose by testing a sample area first.

CUTEK® Interior is not compatible and should not be used in conjunction with CUTEK® Extreme CD50 and CUTEK® Wood Preservative.

CUTEK® Interior is not recommended for use on timber flooring or food preparation surfaces.

CUTEK[®] INTERIOR

COVERAGE GUIDE

NEW TIMBER 16m²/L

OLD ROUGH TIMBER 10m²/L

Note: Practical spreading rates will vary depending on such factors as application method, ambient conditions and surface porosity and roughness.

MAINTENANCE

Prior to application of a maintenance coat, ensure all surfaces are sanded back with 180 grit sandpaper to an even appearance. Apply additional coats of CUTEK[®] Interior to achieve your desired effect.

ADDING COLOUR

It is important to understand that CUTEK[®] Interior cannot be mixed with a CUTEK[®] Colourtone. However, if a tinted/coloured appearance is desired, the use of pre-tinted CUTEK[®] Wiping Stain can be used prior to coating with CUTEK[®] Interior.

CUTEK[®] Wiping Stain is pre-tinted with CUTEK[®] Colourtones and should be coated over with 2-3 coats of CUTEK[®] Interior.

CUTEK[®] Wiping Stain allows you to achieve a similar look on interior timber surfaces as you would with CUTEK[®] Extreme CD50 when using the same CUTEK[®] Colourtone.
